IHET toolset inserted into HTML page manually or via server program. This can involve but is not limited to adding a MouseOver event to the <a> tag that is the link catalyst which uses DHTML to "pop-up" a toolset over or near the associated link.

The toolset can be implemented as, but not limited to, a graphic with associated image map that uses OnClick events to call the desired functioning graphics that are used to present the toolset(s) can be selected from a group IHET defines, can be created from IHET tools provided to user, or can be selected from a database based on keyword selection. The four that are described here are: Check It Later, Anchor Here, Open in New Window and Open in Taskbar.

personalize iLOR Search

iLOR is not just a "search engine".

It is a "Research Engine"!

iLOR Search results have many more options than regular search sites! When you pause your cursor arrow over a search result using iLOR, an option menu appears that gives you exciting, useful and easier ways to explore the results that are relevant to your search and ignore the ones that are not.

- make your web search quick and efficient
- no more clicking the "back" button a million times
- no more running searches over and over
- pick only the results that are important to you
- put the best search results in "My List"
- save search results for later use
- explore any result and never get lost

### Sample Search Results -- See a Demo! (Non-Flash Demo)
